

Have Your Pet Cat Care Here!

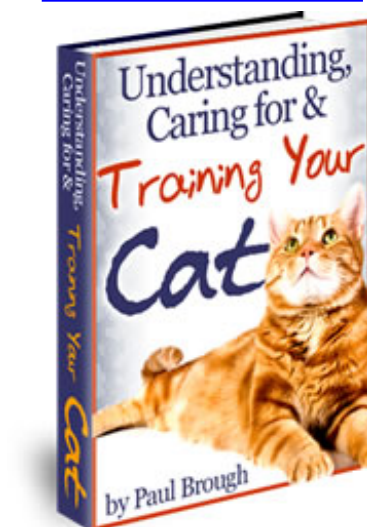

All about pet care for your **cats**.

A [healthy cat](#) is happy and alert. It is active, curious about its surroundings and reacts to all stimuli quickly and appropriately. In spite of all our efforts to domesticate it, the [cat](#) remains close to nature, and it enjoys the opportunity to walk by itself in open countryside. [Cats](#) have retained their natural hunting instinct and, in the absence of live prey, they will hunt suitable inanimate objects. By devising hunting and chasing games to play around the home or garden, owners can make use of this natural instinct to promote bonding. [Cats](#) will also enjoy being stroked by humans they trust, provided that they do not feel their independence is compromised.
